

# WELL-BEING AT HOME STARTS HERE

## Create a Care Plan

One of our Care Managers will help you decide between a daytime or evening schedule, an overnight schedule, or 24/7 live-in care.

---

## Meet Your Caregiver

Our caregivers are trained professionals who are matched to you based on compatibility, background, and experience.

## Experience Well-Being

Following a customized plan of care, our professional caregivers will help you with your daily activities so that you can experience what it means to put first what matters most; your well-being.

# INCLUDED IN EVERY CARE PLAN

## Caregiving Services

Meal preparation, light housekeeping, laundry, grocery shopping, transportation, medication reminders, walking assistance, bathing supervision, dressing assistance, cognitive stimulation activities, and much more!

## Comprehensive Screening Procedures

All staff must pass a rigorous screening and background check process which includes an interview, verification of past employers, training class and exam, criminal records check, and driving records check. Additionally, staff are background checked each year.

## Caregiver Management and Retention

Our caregivers are employees of our company. We handle their payroll, conduct annual performance reviews, provide ongoing management, and offer employee benefits which results in greater commitment to our clients.

## 24/7 Backup Support

Our 24/7 support provides backup caregivers for when your assigned caregiver is unable to work or for when you need additional in-home care. You also receive ongoing care management services to navigate care options, community resources, and to ensure your satisfaction with your caregiver.

## Ongoing Education for Caregivers and Families

From learning about specific diseases to safety procedures in the home, our caregivers receive ongoing training and stay well-informed. Additionally, we provide educational webinars for family members on a variety of topics including how to make the home safe and dementia care communication tips.
